Dr. Dionysios Dionysiou is a world-renowned expert in the area of advanced oxidation processes for the purification of water. As a result of his tremendous accomplishments in his field, he was recently selected as a member of the European Academy of Sciences (EURASC). This body is “a non-profit non-governmental, independent organization of the most distinguished scholars and engineers performing forefront research and the development of advanced technologies, united by a commitment to promoting science and technology and their essential roles in fostering social and economic development.” Dr. Dionysiou’s vast accomplishments in the field align well with the mission of the organization. He is a UNESCO co-chair on “Water Access and Sustainability,” editor of three prestigious journals and author or co-author of more than 325 publications.

Congratulations on this high honor, Dr. Dionysiou!!
