Printing from Virtual Environment

1) Log in to Virtulab and If it asks for authentication enter your central login credentials. After that it will pop up Papercut Client box.

2) Now if you want to print a document, go to Print on your application.
3) Click Print and select the Printer.

4) After you click print it will prompt for authentication again. Enter your central login credentials.

5) If the authentication is correct, it will prompt and say document is held in a queue.
6) Now go to the Release Terminal located in the OCC lab for that particular printer or go to your Papercut page and release the job.
