

How to connect to your CEAS files (Y:\ drive)

Instructions for students using Windows 7 & 10:

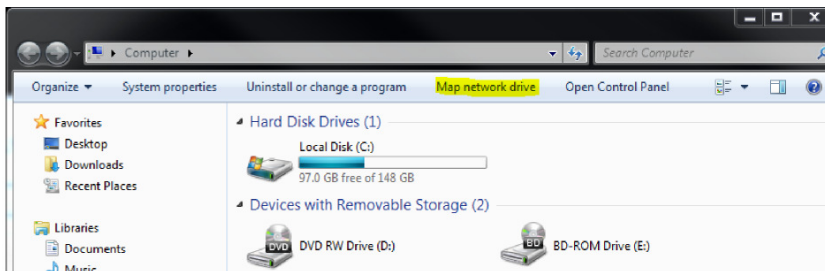

1. Connect to the UC network

A. **Off Campus** - If you are **not** connected to the UC network and you are **off** campus, go to this web site: <https://www.uc.edu/about/ucit/services/connectivity-fac-staff.html>, section Off Campus Internet, for instructions to connect to UC's secure VPN (Virtual Private Network).

[If you have problems connecting to the UC SSL VPN, please call the **UCIT Help Desk** at **556-4357**.]

B. **On Campus** – If you are not connected to the UC network and you are **on** campus, connect through “UC_Secure”. Click <https://www.uc.edu/about/ucit/services/connectivity-fac-staff.html>, section On Campus Internet, for instructions.

2. Click Windows “**Start**” button .
3. Select “**Computer**”.
4. Click on “**Map network drive**” (see yellow highlight below):

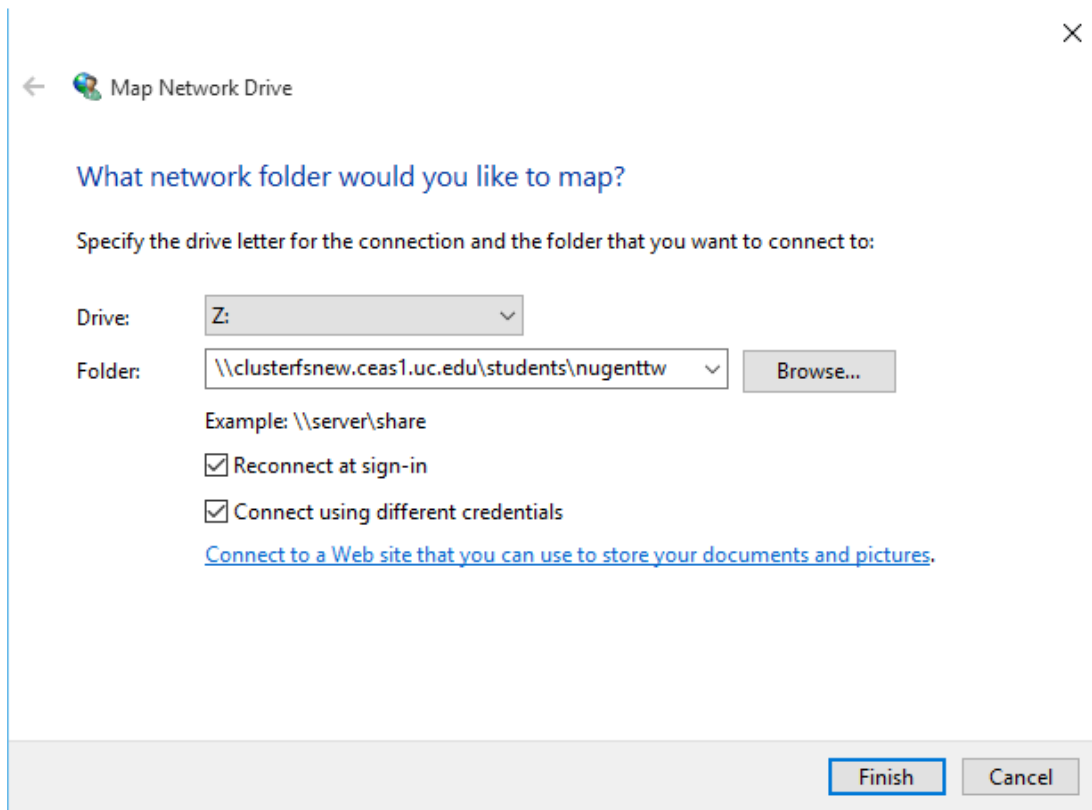

5. The “Map Network Drive” dialog box will appear, as shown below:

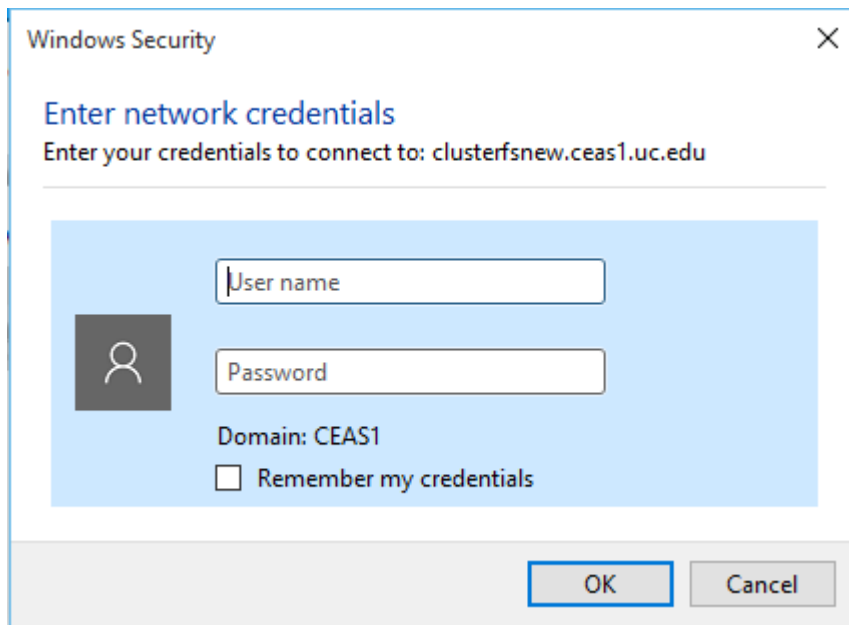

6. For **“Drive:”**, choose a drive letter (or leave it at Z:) using the drop-down arrow to the right.
7. For **“Folder:”**, type the path specified below, replacing the **[6+2username]** with **your “6+2”** username (Ex: nugenttw).
 - a. Type the path shown below:

`\\clusterfsnew.ceas1.uc.edu\students\`**[6+2 username]**

Ex. `\\clusterfsnew.ceas1.uc.edu\students\nugenttw`
8. Make sure the check boxes for **“Connect using different credentials”** and **“Reconnect at logon”** are checked.

9. Click **Finish**.
10. The “Windows Security” dialog box will appear, as shown below:

11. Type **ceas1\[6+2username]**. Again, replace the **[6+2username]** with **your** “6+2” username. Ex. “nugenttw”

11. Type your UC Central Login Service (CLS) password in the next box.
12. Click **“OK”**.
13. After a few seconds, the network drive will be mapped.
